

KUNKLE BAILEY 716 SAFETY RELIEF VALVE

A safety relief valve that combines a top guided, unobstructed seat bore with full lift capability to provide maximum discharge

FEATURES

- Positive reseating achieved via freely pivoting EPDM discs for gas, hot water and other liquid duties up to 150°C.
- Optional Aflas soft seats increase the range to 200°C.
- Precision lapped stainless steel trim gives positive re-seating for steam duty at higher temperatures.
- Choice of threaded or flanged inlet connections.
- Fitted with test lever for inline safety checking.
- Alternative sealed dome for service conditions requiring a pressure tight seal on the discharge side (eg. liquid service).

GENERAL APPLICATION

The 716 is certified to BS6759 pt 1, 2, 3 and is suitable for the protection of vessels, pipelines and equipment using hot or cold water; air; process or corrosive liquids; cold and fine gases and for clean steam and gases in hygienic environments.

TECHNICAL DATA

Material:	Bronze, Stainless steel
Sizes:	½" to 2" (DN 15 to 50)
Connections	
Inlet:	Threaded or flanged
Outlet:	Threaded
Pressure range:	5 to 355 psig (0.35 to 24.5 barg)
Temperature range:	-20°F to 500°F (-29°C to 260°C)

28.0	468					
30.0	501					
32.0	533					

* Minimum overpressure = 0.07 barg at set pressure less than 1.0 barg.

Maximum pressure per size based on 716 bronze valve. 716 CI and SS maximum pressure 12.5 barg.

Other gases

If you wish to use the valve on other compatible gases, the sizing details above can be used.

However, the valve capacity will change depending on the specific gravity of the flowing gas.

Multiply the valve air capacity by $1/\sqrt{SG}$ to give the gas capacity.

SG = specific gravity (relative to air = 1).

Useful conversions

$Nm^3/h = l/sec \times 3.60$

$SCFM = l/sec \times 2.12$

KUNKLE BAILEY 716 SAFETY RELIEF VALVE

STEAM CAPACITY/FSH CONVERSION

SATURATED STEAM CAPACITY (kg/h)

Set pressure (barg)	(BS6759 Pt1 at 5% overpressure)*

4.0	131	377	498	792	1291	1996
5.0	157	453	599	952	1551	2398
6.0	184	529	699	1112	1811	2799
7.0	210	605	799	1271	2071	3201
8.0	236	681	900	1431	2331	3603
9.0	263	757	1000	1590	2591	4005
10.0	289	833	1100	1750	2851	4407
12.0	342	984	1301	2069	3370	5211
12.5	355	1022	1351	2149	3500	5412
14.0	394	1136	1501	2388	3890	6015
16.0	447	1288	1703	2708	4410	6818
18.0	500	1440	1903	3027	4930	7622
20.0	553	1592	2104			
22.0	605	1744				

NOTE

* Minimum overpressure = 0.07 barg at set pressure less than 1.0 barg.

Maximum pressure per size based on 716 bronze valve. 716 CI and SS maximum pressure 12.5 barg.

Pressurized (un-vented) hot water systems have the entire discharge capacity handled solely by the valve.

Open vented systems take into account the discharge capacities of the vent. Hence the equivalent discharge of the valve/system is considered to be double the chart capacities above.

NOTES

1. Springs up to 12.5 barg (181 psig) listed above for all materials comply with the requirements of BS6759: Part 1.
 2. The cast iron 716 is only available up to 13 barg (188 psig) on any medium.
 3. The stainless steel 716 is only available up to 12.5 barg (181 psig) on any medium.
 4. Stainless steel springs are available for 716 to the same pressures as shown above.
- * DN 40 and DN 50 716 valves with PTFE trim can not have their springs selected from the above two charts. Refer to factory.

The valves are fitted with a suitable spring. Every valve is tested thoroughly for efficient operation before leaving the factory. Ensure the set pressure is within the range of the existing spring. If not, select and fit the correct spring from the tables above. All our springs are low stressed and painted to minimize corrosion.
