

# KUNKLE BAILEY 766 SAFETY RELIEF VALVE

The 766 safety valve is a double spring high lift valve with high discharge capacity

#### **GENERAL APPLICATION**

The 766 is ideally suited to applications on steam boilers and pipelines where blowdown tolerances are critical.

#### **TECHNICAL DATA**

Material:	Carbon steel
Sizes:	1½" to 3" (DN 40 to 80)
Connections:	Flanged
Pressure range:	5 to 348 psig (0.35 to 24 barg)
Temperature	
range:	-20°F to 446°F (-29°C to 230°C)

## FEATURES

- Top guided piston design incorporates an adjustable blowdown ring.
- Meets all the requirements of BS6759 Part 1.
- Freely pivoting disc and precision lapped stainless steel trim give positive re-seating for steam duty.
- Fitted with a test lever for inline testing as standard.

#### Other temperatures

This steam table is based on saturated steam, at the temperatures shown. For steam systems operating at higher temperatures, the above capacities will need to be derated by using the super heat correction factor.

## NOTES

- 1. Flange sizes are larger than the valve size, refer to the dimensions table.
- 2. Any special requirements will be indicated by the letter X which will be agreed with the sales office.
- For example, paint specification or spring material.
- 3. Any combination of features can be called up eg. MG.
- 4. Flange options are dependent on valve body materials.
- 5. Please see table on page 2 for inlet and outlet connection sizes.
